Irisplant fevers

Typatic State of fevers.

Dialects

V

3 a preternatural secretion of a watery fluid from the bowels and kidneys. In the former case I have called it Diabetes chylosus intestinalis, and in the latter Diabetes renalis chylosus. It is hepatic Chyle.

4 a preternatural secretion of water from the liver.

5 a preternatural secretion and excretion of air from the liver.

6 There is a preternatural secretion and excretion of a black matter from the liver, which has been supposed to be blood. It is a kind of I have called the it the black Vomit of the liver. They all depend upon different action in the liver.

1

The Diseases and Disorders of the Liver are involved in much Obscurity, and the practice in them has hitherto been empirical. Perhaps the Doctrine of the Unity of Disease and the Use of the liver which I have taught, may throw some light upon them.

~~The function assisted to the liver in other~~

A ~~the~~ knowledge of both is ~~Physiology, unless its diseases~~ highly important to a physician. ~~They~~ The diseases of the liver are numerous, ~~too~~ and followed by ~~still more~~ an equal number of Disorders, all of which are more or less Dangerous ~~and~~ in themselves, & ~~colouration~~ ~~is not the~~ still more 10 in their Consequences. I ~~the~~ shall connect ~~the~~ its Diseases & disorders of the liver, ~~for~~ they associate so much with each other that it is difficult to separate them. Its Diseases ~~they~~ are Hepatitis & Hepatirula, or in other words Acute & Chronic Inflammation in the liver in an Acute & Chronic form — a preternatural Secretion & excretion of bile ~~green or yellow~~ V. ~~or of a watery serum called Dropsy or water~~ which ~~disease~~ called Diabetes of the liver

* The matter Discharged from the liver is ~~Dark brown~~ whitish yellow, or ~~white~~, according as it partakes more or less of the ~~Characteristics of~~ colouring matter of the cystic bile. What is called the colour that appears to be pe-=culiar to the hepatic bile contained=ed with cystic bile.

+ It is most to whom the inflam: is on the convex side of the Liver. P. Inward an elevation of the Shoulders - pains in the limbs -

‡ The pain and Cough of this disease are distinguished from the same Symptoms in Pneumony by the following marks. 1 The pain is encreased by pressure under the ribs. 2 It is encreased by a full inspiration. 3 The Cough is dry - deep or hollow - and ~~It~~ is not increased by a full inspiration. By the Cough generally precedes the pain in the side whereas in pneumony it is prior to or coeval to it. To this there is an exception in those suffoc: pneumonies in which there is for a while no cough. All these marks are sometimes blended when the lungs & Liver are diseased at the same time. - ~~It said the~~ It has

~~5th~~

~~6 Hepatic Diarrhoea~~ ~~or Dysentery of the liver; or~~

~~Vulgarly called Bilious~~ ~~Fever~~ ~~Disorders~~ Its Disorders are ~~Jaundice~~ Hepatalgia, or a suspension of the Secretion & excretion of Bile; Jaundice - Schirrus - Scrophula - Gall Stones, &c. ~~&c~~ shall treat in the following order. I have arranged them.

I The ~~Diseases~~ Symptoms of the Hepatitis or of the ~~Fever~~ ~~only~~ differ only ~~as the Fever~~ in degree. They are ~~different~~ ~~forms~~ ~~of~~ Tension & pain in the right Hypochondriac region - Difficulty of lying on the left side - sometimes pungent, but often dull - fever - pain in the Clavicle of the right shoulder - Difficulty of breathing, Dry cough, vomiting - hiccup. This definition is taken nearly word for word from Dr Cullen. ~~&~~ to those practical Writers add the following Symptoms. ~~a difficulty of lying on~~ this left side - a Diarrhoea = or and Dr Thos Clarkson as to excrete the ~~with~~ ~~green~~ green stools = Costiveness, Colic = all ~~tenesmus~~ - I have seen ~~three~~ instances of this ~~Symptom~~ - I have often ~~also~~ ~~&~~ an inability ~~to~~ ~~Sneeze~~ - & swelling = Testimony of Capt Blair. hardness & Soreness of the

= has remarked, that where vomiting attends, the lungs are less affected with Cough, and there is less pain in the Shoulders.

† has experienced in miss Peters, and
Wood: Bryant - miss Alexander - and
miss Wilson.

Sir Jno Pringle says he once saw a Case of Disease of Liver in which the patient used rest only on his hands & knees.

† Dr Thos Clark-

⊙ a Dry tongue. ☿ I have seen
but Dry only when In a Case the tongue
right side. a pain in the patient lay on her
Calf of Leg. Hollerings.

V ♄ I never saw a Case in which
all the above Symptoms took place, but
it is useful to be acquainted with them.
They are varied by Climate, Season and
constitution. Nor is it common for
either of the two sexes
of this Disease
They often run into each other. In
the chronic form to exist separately.
total absence of pain, except when the region
of the liver is pressed with the hand. The
stomach from the Sameness of its office with
the liver is generally affected. Its diseased state
is the most certain Symptom of a diseased
liver. As the pain in Hepatitis is often confounded

Opium - constant headach, constant Sensation,
or Laughing - ~~But all these Symptoms have ceased~~
a yellowness of the Skin - eyes and Skin -
~~=ed in the parts that~~ ~~crease boundaries Intense~~
heaviness in one Arm or Leg - & more Op=
=pression and pain - a pain in the Left
Shoulder ~~It~~ ~~and~~ is said to be the case when the disease
is seated ~~in~~ ~~the~~ ~~Left~~ Side. in the left lobe of the Liver.
Most of these Symptoms have ceased
under my own Observation. The pulse is hyperha,
=rs fortis - hyperchela - & sometimes
nearly natural. It is always most active on the
right ~~side~~ or affected Side. V
sometimes this disease comes on with=
=out any one of the above Symptoms; nor
is its existence known till death from
a wasting of the body discovers by dissection
the complete ulceration or absorption of
the substance of the Liver. This was the case
in the former Case we have seen.

I have said the pain is seated in the
right hypochondriac region, but it is more
often seated in the left. It often in Women

= we never meet with that form of disease we call Spasm in liver - from its not being subject of muscular structure. -

adjoining viscera, and from gall stones.

than men. The only case I have seen of this pain in the left side was in a woman, In which it extends below and under the short ribs.
pain in the left side was in a woman, In the last India this is, but more than one patient in 100 complains of pain in the left side. It is more frequent in this Country.

The mesenentory Lips of this disease in the East Indies are an inordinate appetite - great elevation or depression of spirits - and a sudden stoppage of perspiration. There is a citrin

The causes of this disease are primary that is such as act upon the liver. These I believe are few. They may be summed up in Contusions, the Sun & the Boundary and hypertonatic causes are very numerous. There is scarcely a part of the human body that does not call upon the liver to bear a part, or the whole of the morbid impressions upon it. The old doctrine of the use of the liver considers it as a Cloaca magna

v It is because the
to a vertical sun in ~~Lat~~ the East Indies, &
Other hot Countries, that diseases of the
liver are so much more common in
them than they are in cold Countries. ~~Hence~~ But
diseases of the liver are induced ~~occasion-~~
~~by~~ by Contusions of the head — hence the
sinking of bile which so generally follows
them: Again

head is so much exposed

or great pinch to revive all the impurities
of the blood in order to convey them out of
the system. I consider it not as a sink of
impurities, but as a ~~the~~ the great focus
morbid impressions. ~~the intestines~~ poor ~~a bad~~ ~~receiver~~ of
uniformly upon it. The head & the stomach,
and the womb their excess of impression
discased, often bring and the spleen
The skin when acted ~~on~~ upon ~~alternately~~ uniformly
by heat, or alternately by heat & cold, convey
the impressions made upon it to the liver.
Even a wound upon the fingers and cold feet
Dr Armstrong says have sometimes induced
it. But the two states of disease I am speaking
off are often induced by the same occasions
which induce the bilious fever whether they
act primarily upon the liver, or sympathe-
tically thro' the medium of the brain, or
stomach, or lungs, I know not, but that
the disease is thus produced I infer from

V 4 from its sometimes becoming epidemic
in Common with the bilious fever. Dr
Chisholm mentions an epidemic de-
-fatitis in the Island of Grenada.

1 Bloodletting - copious, in its acute
and frequent in its Chronic form. Dr
Clark of St Domingo drew from 40 Ozs in a
day in this disease in 48 hours in a
hot west India Island. —

It differs in general of its symptoms from
the Hepatitis of both the Indies, & particularly
in affecting persons under puberty as well
as adults. — I am not singular in these ad=
=mitting Hepatitis to be epidemic. There are
several words of it in the annals of medicine.
Dr Chisholm describes it as epidemic in the
Island of Granada, and apart that it spreads by
contagion as well as the yellow fever has
a period that the Hepatitis is Contagious
as well might be defended with Vanswieten the
contagiousness of the Gout. Long - long may

relative force upon those three descriptions

of people in the ½ of the Indies - lastly persons

under puberty are seldom affected with

the hepatic state of fever. D^r Hume says

they are never affected with the yellow fever.

I infer it from the great increase of

Hepatitis acute & chronic and all its conse-

-quent Disorders in ~~the~~ many parts of

the United States. They are the effects of the

same causes which have increased bilious

fevers in our Country. Hepatitis is

~~nothing~~ but a ~~mis~~ bilious

fever, ~~also~~ misplaced, or suffocated in the

liver. It is to the bilious fever, what a

pneumony is to a diffused Synocha, or inflam-

=matory fever. ~~In the latter it affects~~ VI

~~Hepatitis~~ ~~Dr Chisholm~~ Dr Chisholm's
belief in the contagiousness of the Hepatitis
is a full refutation of all that he has
ever written in favor of the contagiousness
of the yellow fever.

Lastly Hepatitis Dr Clyborn says is but
an aggravated by bad water. Bad water
likewise brings on bilious fevers - hence we
derive another argument in favor of the He-
patitis being a suffocated form only of bilious
fever. Hepatitis from miasmata constitute 5/10 of all
its remote causes.
